Dear Mr. Breitenbach,

I am writing to urge CALFED to adopt a plan that:

- Maximizes water efficiency and conservation, and bases future water needs on realistic assumptions rather than inflated demands.
- Removes barrier dams, increases instream flows, and acquires and restores habitat for fish.
- Does not rely on proposed dam raises or new offstream storage reservoirs.
- Improves water quality by enforcing pollution limits.

Thank you for your attention to this matter.

Sincerely,

Cory Black
